

NETWORKS MINISTRIES BUILDING ACCESSIBILITY

Scope of the Project

In Summer 2026, Networks Ministries completed a minor capital upgrade project designed to create safe, inclusive, and barrier-free access across the facility. The initiative focused on modernizing and replacing various concrete entrance pads around the building, featuring a major overhaul of the primary northwest entrance. To complement the physical accessibility improvements, the team restored the front garden area to establish a dedicated community wellness space—providing a peaceful setting for reflection and rest.

Key Infrastructure & Accessibility Upgrades:

- **Main Entrance (NW Side):**
 - Fully rebuilt the accessible ramp at the main entrance.
 - Installed an automated push-button door opener to ensure seamless, barrier-free access.
- **Facility & Operational Access Points:**
 - Replaced concrete slabs at the east access entrance's to ensure a safe, level surface for Networks food delivery operations.
 - Installed new concrete slabs across both south-side building entrances.
 - Installed a new concrete walkway on west-side of building
- **Community Wellness Space:**
 - Revitalized the front garden area and installed a built-in water reservoir system for the flower beds to support sustainable maintenance.
 - Concrete pad and new bench installed.

THANK
YOU!

Project Sponsors

We deeply appreciate your support! Thank you for your belief in us and for supporting our mission.

We also would like to extend our sincere gratitude to our dedicated community members and generous contractors who often go above and beyond. Their vital investment of time, expertise, and resources makes our ongoing work possible.

We would like to thank Steve Janssen for the donation of the bench, and members of the Rotary Club for the donation of material and incredible work building the water reservoir for the garden in the Wellness Space.
