

GYM/LOCKER ROOM & SHOWER RENO.

The recent renovation included enhancements to the gymnasium and a renovation to the adjacent locker rooms. These upgrades have significantly improved the functionality and accessibility of the Networks Ministries shower unit for our clients, helping to meet their personal hygiene needs and ensuring a safe and welcoming environment for the delivery of this essential program.

Scope of the Project

Locker-room/Shower reno: The pre-existing locker rooms comprised two identical open-plan spaces, each featuring a door on the north side opening to the gymnasium and another door on the south side leading directly to the main hall. Due to logistical constraints, this limited the effective use of this space for community members renting the gymnasium for after-school sports and our clients who needed access to the showers during the day.

The renovation separated each of these rooms into a self-contained change room accessible only from the gymnasium, and four shower facilities on the opposite side. This created two distinct change rooms, two smaller individual shower rooms, one wheelchair-accessible shower room, and a family-size shower room.

Key Upgrades:

- Gymnasium upgrades: painting of gymnasium, change out lights to LED bulbs
- Some purchasing of new equipment for gymnasium and folding chairs and dolly for tournaments
- A partition wall has been installed in both locker rooms to segregate this area, with a single access point for each room leading into the gymnasium
- The reno in both locker rooms mirrors each other with the same layout: This space now entails a total of 4 shower units: 2 single units, 1 wheel chair accessible, and 1 family washroom.
